CODE VERTEX

Technology Solutions & Web Development

PROJECT QUOTATION

#CV-2026-042

Date: 18 April 2026

Valid: 15 Days

FROM	PREPARED FOR
Code Vertex Web Development & Digital Solutions	**Studio Sara** studiosara.in | studiosara.uk

Project Context

ALREADY EXISTS (Client's Asset)

studiosara.in — Indian Website — LIVE

✓ Domain registered

✓ Hosting active

✓ Website running

✓ INR pricing logic in place

No changes to existing .in setup.

NEW WORK BY CODE VERTEX

studiosara.uk — UK Website — NEW

★ New UK domain registration (.uk)

★ New UK server hosting setup

★ New website deployment

★ GBP-only pricing engine

+ Integration with existing .in backend.

Scope of Work — What Code Vertex Will Deliver

01	**studiosara.uk Domain Registration** ★ NEW	Register the studiosara.uk domain on behalf of Studio Sara. Full DNS configuration, nameserver setup, and SSL certificate (HTTPS) provisioned. Domain cost fully included in the project fee.
02	**UK Server Hosting — Provisioned & Managed** ★ NEW	A dedicated UK hosting server will be provisioned and configured — separate from the existing India server. Includes server config, deployment environment, and security hardening. Hosting cost is fully included — Studio Sara need not purchase any hosting separately.
03	**studiosara.uk Website Deployment** ★ NEW	Full UK website built and deployed on the new UK server — mirroring the product catalogue but independently optimised for international users with GBP-only pricing and UK-market appropriate presentation.
04	**Shared Database — UK Site Connected to Existing .in Backend** INTEGRATION	The studiosara.uk website will connect to the existing shared database powering studiosara.in. Any admin update reflects instantly on both sites. No data duplication, no double-entry. The .in database setup remains completely untouched.

05	**Single Admin Panel — Manage Both Sites from One Dashboard** INTEGRATION	The existing admin panel will be extended to manage the .uk website as well. No new login, no new dashboard. Products, pricing, offers, and content updates made once automatically apply across both sites, with region-specific overrides where needed.
06	**GBP-Only Pricing Engine for UK Website** ★ NEW	A dedicated pricing module built exclusively for the UK website. Clean GBP-only pricing engine — no currency clutter, no conversion confusion. Prices displayed cleanly in British Pounds (£) for a smooth, trustworthy checkout.
07	**Smart Domain-Based Traffic Routing** ★ NEW	An intelligent routing layer directs visitors automatically: studiosara.in → India experience (INR, multi-currency); studiosara.uk → International experience (GBP only). Ensures clean traffic separation, correct pricing per region, and accurate analytics.

Additional Features — New Requirements

08	**Porter Delivery Option — No Shipping Charges** ✦ ADDITION	A new delivery method option — Porter — will be added at checkout. When the customer selects Porter as their delivery method, no shipping charges will be applied. The option will be clearly presented alongside existing delivery methods in the checkout flow.
09	**Manual Shipping Rate for Orders Above 30 Metres** ✦ ADDITION	For orders where total fabric quantity exceeds 30 metres, shipping will not be auto-calculated. A clear message will be displayed to the customer informing them that the shipping rate for large orders (above 30 mtrs) will be communicated manually by the Studio Sara team before order confirmation.
10	**Weight Discrepancy Shipping Notice** ✦ ADDITION	A notice will be added to the checkout / order summary page informing customers that in case of any weight discrepancy in the shipment, the applicable shipping charges will be communicated by the Studio Sara team. This sets clear expectations and reduces post-order disputes.
11	**Cart-Level Fabric Slab Aggregation** ✦ ADDITION	A smart cart feature that groups products sharing the same fabric across the entire cart — regardless of design differences. For example, if a customer adds two differently-designed products using the same base fabric, the total metres of that fabric are aggregated universally in the cart to determine the correct fabric slab pricing tier. This logic applies at cart level only — ensuring fabric-quantity discounts are correctly applied even when the same fabric appears across multiple distinct products.

Cost Breakdown — How Rs. 10,000 Is Distributed

Note: studiosara.in (India website) is already live with its own domain and hosting. The Rs. 10,000 covers everything needed to launch and integrate studiosara.uk — UK domain, UK hosting, new website, full integration with the existing .in system — plus the new shipping logic, routing, and cart slab features.

#	Component	What's Included	Cost

#	Component	What's Included	Cost
1	**studiosara.uk Domain Registration**	UK ccTLD domain (.uk) registered for 1 year. DNS setup + nameserver config + SSL certificate	Rs. 1,000
2	**UK Server Hosting Setup**	Dedicated UK server provisioned for 1 year. Server config, deployment environment, security hardening	Rs. 1,500
3	**studiosara.uk Website Development**	Full UK website built & deployed on UK server. Product pages, checkout, GBP pricing UI	Rs. 2,000
4	**GBP Pricing Engine**	Dedicated GBP-only pricing module. Clean, no multi-currency clutter for UK users	Rs. 1,000
5	**Database Integration**	UK site connected to existing .in shared database. Real-time sync — one source of truth for both sites	Rs. 800
6	**Admin Panel Extension**	Existing admin panel extended to manage .uk site. No new dashboard — single control for both websites	Rs. 400
7	**Routing Logic & Go-Live**	Domain-based smart routing (.in vs .uk). Testing, QA, DNS propagation, go-live support	Rs. 300
8	**Porter Delivery Option**	Porter option at checkout — zero shipping charges when selected. Integrated with existing delivery method selector	**Rs. 500**
9	**Manual Shipping for Orders >30 Mtrs**	Display clear message for large quantity orders (above 30 mtrs). Shipping rate communicated manually by Studio Sara team	**FREE**
10	**Weight Discrepancy Shipping Notice**	Checkout notice for weight-based shipping adjustments. Team will communicate any difference post-dispatch	**FREE**
11	**Cart-Level Fabric Slab Aggregation**	Smart cart groups same-fabric products across different designs. Total fabric metres aggregated universally for correct slab pricing	**Rs. 2,000**
	TOTAL	All components — UK domain + hosting + website + integration + new features	**Rs. 10,000**

What Studio Sara Does NOT Need to Arrange Separately

✗	Item	Covered By
✗ No need to buy	**UK Domain (studiosara.uk)**	Registered by Code Vertex — included in Rs. 10,000
✗ No need to buy	**UK Server / Hosting**	Provisioned by Code Vertex — included in Rs. 10,000
✗ No need to buy	**SSL Certificate (.uk)**	Configured by Code Vertex — included in Rs. 10,000
✗ No need to buy	**DNS / Nameserver Setup**	Handled by Code Vertex — no action needed from client
✗ No need to buy	**Separate Admin Panel**	One existing panel manages both sites — no new tool needed
✗ No need to buy	**Data Migration or Duplication**	Shared DB means zero duplication — .in data auto-available on .uk

✗	Item	Covered By
✗ No need to buy	**Porter Integration Tool**	Built and configured by Code Vertex — included in Rs. 10,000
✗ No need to buy	**Separate Slab Logic System**	Fabric slab aggregation built into existing cart — no 3rd party needed

Delivery Timeline

Day	Activity
Day 1	Register studiosara.uk domain | Provision UK hosting server | SSL setup
Day 1–2	Deploy UK website | Connect to shared database | Extend admin panel
Day 2	Build GBP pricing engine | Implement domain-based routing logic | Porter delivery option setup
Day 2–3	Build cart-level fabric slab aggregation | Shipping notices & manual rate messaging
Day 3–4	Full testing & QA on both sites | DNS propagation | Performance & UAT checks
Day 4	**GO LIVE — studiosara.uk fully operational & integrated with studiosara.in**

Payment Terms

0% Advance	100% on Completion
Rs. 0	**Rs. 10,000**
To be paid before work commences	Due upon go-live, before final handover

Authorised By	Client Acceptance
